

Tech Info Screen

Faster Fixes, Fewer Frustrations

Tech Info Screen

Goals & Success metrics

Operational Excellence

To improve the speed and accuracy of Customer Support troubleshooting, this feature introduces a user-accessible page containing technical information to resolve Customer Support cases faster.

Tactics

- Self-service: Provide a clear, accessible page under My Account for users to share technical details without leaving the TV experience.
- Streamline internal processes: standardising how technical data is surfaced across platforms, reducing manual investigation time.

Success KPIs

- Average Number of Days Open for TV-related issues
- Average Number of CSR Interactions for TV-related issues

Tech Info Screen

Feature scope

Scope

Countries	All
Devices	TV
User Status	Registered, Subscribed, Lapsed
Pages	My Account, System Information
Components	QR Code System Information CTA Dynamic Technical Metrics

Out of scope

Components	Error Modal Redesign (look forward)
	Playback-specific metrics
	Other Devices (e.g. Mobile)
	Crash logs/Debug Reports

Definitions

System Information The approved name for the Tech Info Screen, where device and app metrics are displayed for troubleshooting and sharing with support.

Tech Info Screen

Moderated Interview Results

Context

Moderated interviews with 5 subscribed users across UK, Australia, and Canada tested error scenarios and navigation to the Tech Info Screen.

High-Level Research Question

What steps do users take when experiencing a technical issue, and does the presence of a page with technical information support their expectations and troubleshooting behaviour?

Key Findings

- Users try every **self-resolution** option (retry, restart, switch device, FAQs) before contacting support, often delaying outreach.
- When they do seek help, **mobile is the preferred** channel, and users **commonly attach an image of the error modal** for clarity.
- The **Tech Info Screen is valued** when instructions are simple; “System Information” works best when paired with a clear explainer and privacy note.
